Frankfurt Now!', Kossmann.dejong explains how the lab works. Residents and visitors are actively challenged to participate in the debate, and themselves become part of the Historical Museum Frankfurt, a museum about and engaged with the city.

Publication

Kossmann.dejong also designed the book *Die Schneekugel* [The Snow Globe] to accompany the exhibition 'Typically Frankfurt!'. Images and text share the background behind the snow globe, including stories from the eight artists and intriguing details of the scale models. The book is available in the museum shop and online via Henrich Druck + Medien.

Concept & design: Kossmann.dejong

Content: Historisches Museum Frankfurt
